

# AIMS, Mohali

## About the Institute

Dr. B.R. Ambedkar State Institute of Medical Sciences (popularly known as AIMS Mohali ) is the fourth medical college of the Punjab State Government. We have received our first batch of 100 MBBS students for the Academic session of 2021 -2022. We have distinguished medical faculty in pre-clinical, medical, surgical, and allied specialties. State-of-the-art machinery, equipment, and essential infrastructure are being set up to provide high-quality medical education as well as patient care.

## Our Values

True to our motto; Humanity, Service, and Equality, it will be our constant endeavor to train competent, compassionate, and caring physicians through excellence in teaching, patient care, and medical research with a core component of inclusivity

## Department of Internal Medicine

The department provides outdoor, indoor, and 24-hour emergency services to patients at District Hospital Phase 6, Mohali. Dept. also runs specialty clinics like the Rheumatology clinic, Nephrology clinic, and Geriatric clinic. We are committed to advancing medical education for constant upgradation and keeping in pace with the ever-changing field of Medicine

# Snake Bite

## *The Neglected Tropical Disease*

WHO reinstated snake-bite envenoming to its category A neglected tropical diseases (NTDs) list. Every year, more than 95 000 people die from snake bites, and a further 300 000 survive but with permanent disabilities. Most snake bite victims live in the world's poorest communities, with agricultural workers, children, and rural dwellers most at risk. About half of documented deaths from snake bites are in India

Most of the fatalities are due to the victim not reaching the hospital when definite treatment can be administered. It continues to adopt harmful first aid practices such as tourniquets, cutting and suction, etc. Studies reveal that primary care doctors do not treat snakebite patients mainly due to lack of confidence.

## About the CME

This is the first in the series of CMEs planned that we will be hosting on the most relevant topics and the latest guidelines for commonly encountered diseases. We will be conducting these sessions with the most decorated faculty par excellence who are the leaders in their subject field.

## Who should participate?

Primary care physicians, Internal Medicine Specialists, Emergency Medicine Specialists, Emergency Medical Officers, Medical Officers, and Senior/Junior Residents (Academic/Non-Academic). Also useful for Postgraduate and Undergraduate Medical Students.
